ABOUT ME

I started programming with algorithm development and Java. Then I met C#. I have developed freelance projects in web development, game development, and desktop application development. I am currently building backend solutions for my own projects.

EXPERIENCE

Vyrin Lab – Backend Developer

2024 – Continues

- Led backend development for **Apparelte**, building a scalable REST API with JWT authentication.
- Developed and optimized key features like outfit feeds, search, and category management.
- Implemented AWS-backed media and background processing for a smoother user experience.

Freelance – Software Developer

2023-2024

- Developed the **Korkmaz Elektrik website** using Next.js 15 with responsive design and static site generation for optimal performance.
- Built a modern web platform for Korkmaz Elektrik featuring dynamic content management and contact form integration.

EDUCATION

Karadeniz Teknik Üniversitesi

- COMPUTER PROGRAMMING | 2020 – 2024

SKILLS

- **Django & DRF** – RESTful APIs, authentication, scalable backend architecture
- **Database & Performance** – PostgreSQL, Redis caching, query optimization
- **API & Integrations** – RESTful design, JWT, Firebase, API documentation
- **Cloud & DevOps** – AWS, Celery, production deployment
